

Medical Billing Services

TriMed Billing Solutions offers providers resolutions to their billing needs. Some offices only need us to provide the basics in billing. Some duties in the Full Cycle Revenue management are handled directly in the providers office and we provide the back-end services. These duties will include:

- Claims submissions
- Claims follow up
- Verification of insurance
- Payment posting
- Denial management & appeals
- Monthly reporting
- Statements*

*There is an additional fee for statements that are mailed by our office. For providers that use their own software to submit claims, submitting statements is included in the quote for services.
